The Children of San Angelo Social Health Index: The Indicators

The Children of San Angelo Social Health Index was developed by ASU Community Development Initiatives. It provides information to compare the well-being of children in our neighborhoods. The Index compiles information from the US Census Bureau, the Texas Education Agency, and the San Angelo Police Department into “report cards” on each of the city’s 20 census tract neighborhoods.

Each neighborhood is rated on 16 indicators describing facets of the neighborhood that impact children. The indicators form a comprehensive index, but they are broken down into four domains that describe children’s neighborhood and households, income support levels, parental arrangements, and qualities of the neighborhood elementary schools serving the children. The following table identifies the indicators.

Neighborhood & Households	Income Support	Parental	Neighborhood Elementary Schools
(4 Indicators)	(4 Indicators)	(4 Indicators)	(4 Indicators)
Percent Change in Child Population 2010-2015	Child Poverty Rate	Percent Children Living in Two-Parent Households	Percent Disadvantaged Students in Neighborhood Elementary Schools
Percent Female-Headed Households that have Children	Poverty Rate for Pre-School Children under Age 5	Percent Children under Age 5 Living in Single-Parent Families	Student-Teacher Ratio in Neighborhood Elementary Schools
Percent Children Living in Households Receiving Public Assistance	Percent Families in Poverty	Percent Children Living with Legally Responsible Grandparent	Average Years Teacher Experience in Neighborhood Elementary Schools
Violent Crime Incidents per 1,000 Children	Median Income (MFI) of Families with Children as a Percent of Citywide MFI	Percent Children with all Parents in the Labor Force	Postsecondary Readiness Score for Neighborhood Elementary Schools

The Children of San Angelo Social Health Index: The Neighborhoods

The map below identifies the geography of the city's 20 census tract neighborhoods.

The Children of San Angelo Social Health Index: Summary Results

Each neighborhood was graded on a 100 point scale with scores based on the 19 indicators. The neighborhood with the best results received a score of 100 and the one with the least desirable results received a score of 0. Neighborhoods then received a ranking that indicated where they fell in comparison to the other neighborhoods of San Angelo. The following table depicts how conditions for children in each neighborhood compare to the other neighborhoods in the city.

Neighborhood	Tract	Children's Index (Average of 16 Indicator Scores)	Rank
Bonham	17.07	74	1
Vista del Arroyo	13.04	72	2
Sunset	13.03	72	3
ASU - College Hills	13.01	69	4
Glenmore	8.01	63	5
Santa Rita	10	60	6
Bluffs	11.01	60	7
Southland	17.06	58	8
Paulann	3	57	9
Riverside	1	56	10
Belaire	8.02	54	11
San Angelo		52	
Bentwood - Nasworthy	17.08	52	12
Angelo Heights	12	49	13
Reagan	4	48	14
Fort Concho	9	46	15
Central	11.02	43	16
Lake View	2	37	17
Rio Vista	14	30	18
Fort Concho- East	7	29	19
Blackshear - Downtown	18	24	20

The Children of San Angelo Social Health Index: Neighborhood Fact Sheets

Fact sheets follow for each of the 20 census tract neighborhoods of San Angelo as depicted in the map below. The Fact Sheets are organized by tract number. The Fact Sheets report outcomes for each of the 21 indicators in the Children of San Angelo Social Health Index. The Fact Sheets include the citywide results for each indicator as well as the neighborhood score and rank for each domain.

Data reported in the Fact Sheets is from the following sources:

The US Census Bureau, 2010-2014 American Community Survey
The San Angelo Police Department
The Texas Education Agency

The Children of San Angelo Social Health Index is a project of Community Development Initiatives at the Angelo State University Center for Community Wellness, Engagement, and Development.
